

Orian Sharoni

Researcher in Generative AI for Music and Speech

Doctoral Candidate at Sorbonne Center for Artificial Intelligence & IRCAM

[Scholar](#) · [LinkedIn](#) · [GitHub](#) · [X\(Twitter\)](#)

I research and train generative models that listen and play music, bringing together my background in computer science, cognitive research, and musicology. PhD candidate at Sorbonne University and IRCAM, with prior experience founding an audio ML consultancy and deploying production ML systems.

Academia

PhD in Computer Science

2023–July 2027 (expected)

[Sorbonne University](#) / [SCAI](#) & [IRCAM](#), Paris

- Research topic: Collective Listening and Learning Agents in Generative Improvisation.
- [SOUND.AI](#) doctoral fellowship (EU Marie Skłodowska-Curie COFUND).
- Advisors: Gérard Assayag and Vincent Lostanlen.

M.A in Cognitive Science

2014–2017

Tel Aviv University

Research excellence scholarship; final grade: **99/100**.

Publications

- *LAION-Tunes: An Open 1.4M-Track Dataset and Perceptual Benchmark for AI-Generated Music*. **NeurIPS 2026, accepted**.
- *Measuring Context Use in Music Generation*. **Under review, ICLR 2027**.
- *SASPEECH: A Hebrew Single Speaker Dataset for Text To Speech and Voice Conversion*. **Interspeech 2023**. [Paper](#)
- *The formation of preference in risky choice*. **PLOS Computational Biology, 2019**. [Paper](#)
- Audio ML without ground truth – PyData London 2022. [Talk](#)

Industry

Founder and Machine Learning Researcher

Up-AI

2019–2023

- Founded an audio ML consultancy; developed speech and music products for American and Israeli startups and collaborated with university labs.
- Co-developed the **Sync Vx vocal alignment plugin with Waves Audio**, automating speech and music alignment and dubbing. [Project](#)

Data Science & Algorithms

Soluto / Asurion

2017–2018

- Deployed real-time deep-learning NLP for a chat-support app serving **4 million users** in the US.
- Built sentence-embedding search and completion functionality. [Poster](#)

Research

Audio ML

Generative music and speech; transformers; diffusion models.

Evaluation

Perceptual evaluation, experimental design, statistical modeling.

Agentic AI

Coding agents for research and software development; tool use, workflow automation, and evaluation.

Implementation

Python, PyTorch, Librosa, MATLAB.

Production ML

Docker, Kubernetes, AWS.
